# In-Situ Decontamination

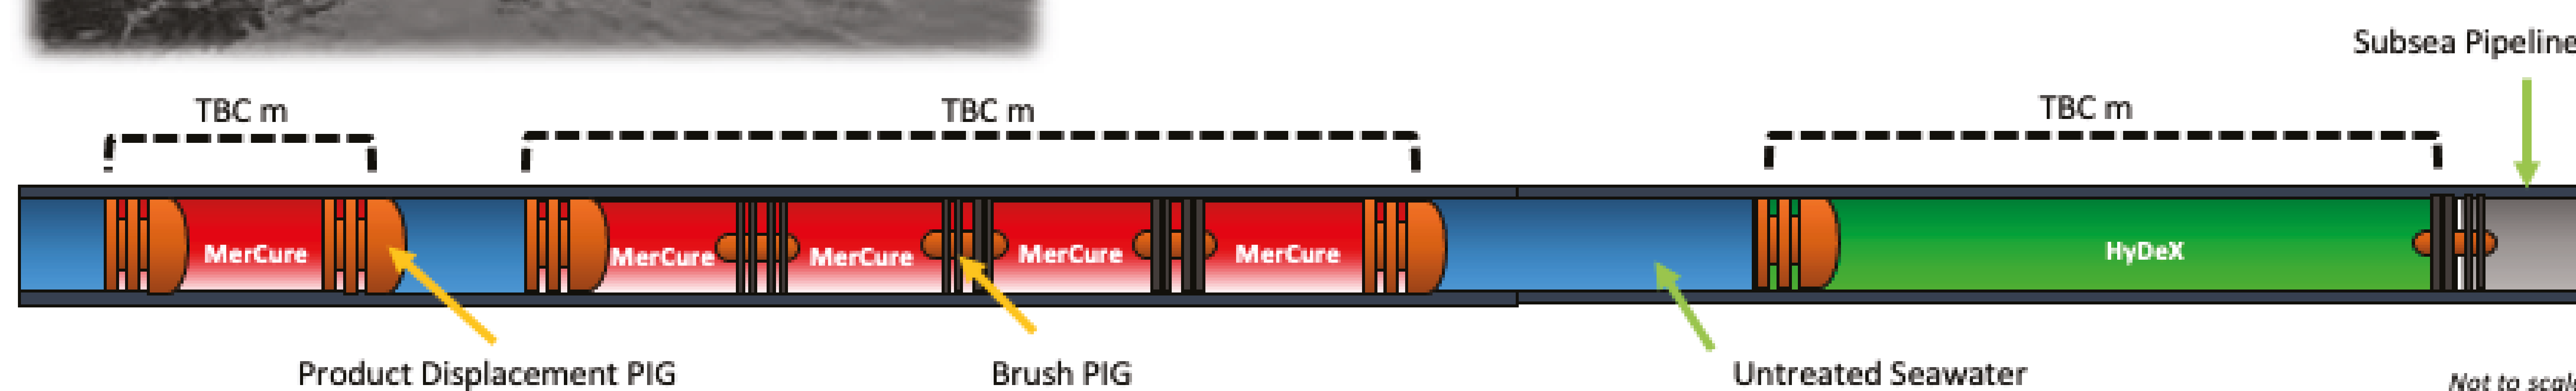

- In-situ decontamination is closed-loop circulation with **MerCure**
- **MerCure** is a proprietary product
- Decontaminates mercury, NORM, and arsenic

- Closed-loop circulation of **offshore platforms** and **refineries**
- **Tank** and large **process vessels** including **FSO** & **FPSO** tankers using 360° impingement system

- Low volume chemical pigging of **onshore** and **subsea pipelines** to achieve the required contact time

Example of In-situ pipeline decontamination using **MerCure**

- Detection to non-detectable levels
